

Move Dining Table

Design André Schelbach

At long last - an innovative solution for every corner seat has finally been developed! Move is the name of the new movable dining table from Yomei that radically simplifies getting in or out of a corner seat. The table top can be adjusted in any direction by up to 30 cm and fastened in any position without compromising on stability. It is loosened and fastened by means of a stainless steel twist mechanism in the centre of the table. The ultra thin-looking table top is made from solid wood and is available in a choice of walnut, wild oak or beech heartwood. All sizes ranging between 160 and 220 x 100 cm (L x W) can be supplied. The table leg and locking mechanism at the centre of the table top are available in either polished or brushed stainless steel.

twist mechanism
